

Product Requirements Document (PRD)

Project Name: Local Government Area (LGA) Citizen Portal

Client: Mr. Abdul Adejoh

Contractor: KVL Systems and Solutions Limited

Timeline: 4 Months

Date: Friday, 20 March 2026

Version: 2.0

1. Introduction

1.1 Purpose

The purpose of this document is to outline the requirements for the development of a comprehensive digital governance and citizen engagement platform designed to publicise the activities, projects, and financial allocations of Nigeria's 774 Local Government Areas (LGAs). The platform will enable every Nigerian citizen to engage with, track, monitor, and provide feedback on government projects and financial activities at the local government level, fostering transparency, accountability, and civic participation.

1.2 Scope

The platform will serve as a centralised public hub where:

- i. Citizens can register, identify their State and LGA, and actively engage with their local government through feedback, reactions, and monitoring tools.
- i. Local Government Chairmen and their appointed staff can post updates, share project progress (with photos, videos, and text), and interact with citizens.
- i. Federal allocation data is publicised monthly so citizens can track what each State and LGA receives.
- i. An advertising and ads placement system generates revenue through subscription-based ad plans.
- i. The portal admin manages content creation, LGA management, user management, ads management, and allocation information publishing.

The platform will also integrate with government data systems and payment gateways to provide additional transparency and seamless financial transactions.

1.3 Target Audience

- i. **Primary Users:**
Nigerian citizens who wish to track, engage with, and monitor their local government's activities, projects, and financial allocations.
- i. **Secondary Users:**
Local Government Chairmen and their appointed staff who register their LGA on the portal to showcase projects and engage with citizens.
- i. **Advertisers:**
Businesses and organisations seeking to place advertisements on the platform via subscription plans.
- i. **Administrators:**
Platform admins responsible for content creation, LGA verification, user management, ads management, allocation data publishing, and system oversight.

2. Product Overview

The Local Government Area (LGA) Citizen Portal is a web-based platform that publicises the happenings across Nigeria's 774 Local Government Areas. The platform serves multiple user groups:

Citizens can:

- i. Register on the platform by providing their name, State, and LGA.
- ii. View and monitor what their LGA is doing, including ongoing and completed projects.
- iii. Engage with their local government through likes, dislikes, comments, feedback, and reactions.
- iv. Track monthly federal allocations to States and LGAs.
- v. View project updates on an interactive map.
- vi. Share posts via WhatsApp, Twitter (X), and Facebook.
- vii. Report inappropriate content.
- viii. Access archived projects and press releases.

Local Government Areas (LGAs) can:

- i. Register on the portal with comprehensive LGA details (upon registration, admin charges apply after the first 3 free months).
- ii. Showcase completed and ongoing projects with pictures, videos, and textual information.
- iii. Engage with citizens through comments, reactions, and feedback.
- iv. Track project progress and public sentiment.

Administrators can:

- i. Create and publish content related to federal allocations and LGA activities.
- ii. Manage full LGA registration, verification, and oversight.
- iii. Manage all user accounts and activities.
- iv. Manage ads placement, subscription plans, and advertising revenue.
- v. Monitor platform performance and generate reports.

Advertisers can:

- i. Subscribe to ads placement plans to advertise on the portal.
- ii. Manage their ad campaigns through a self-service dashboard.

3. Functional Requirements

3.1 Citizen Registration & Engagement

i. **Citizen Registration:**

Every Nigerian citizen can register on the platform by providing their full name, email address, phone number, State, and Local Government Area. Registration is free and open to all.

ii. **Citizen Dashboard:**

Upon registration, citizens gain access to a personalised dashboard showing updates from their selected LGA, including projects, allocation data, and engagement metrics.

iii. **Engagement Tools:**

Citizens can like, dislike, comment on, and provide feedback on LGA posts and project updates. Citizens can also flag or report content they find inappropriate.

iv. **LGA Citizen Statistics:**

The backend will track and display how many citizens from each LGA have registered on the platform, enabling LGAs to gauge citizen interest and participation levels.

v. **Authentication:**

OTP authentication via SMS/email for secure citizen registration and login.

3.2 LGA Registration & Verification

i. **LGA Profile Creation:**

Each LGA must register on the portal by providing comprehensive details including: LGA name, State, Chairman's name, contact information, office address, LGA population data, key sectors (e.g., health, education, infrastructure), and a brief description of the LGA.

ii. **Verification Process:**

Government ID, Unique LGA code (provided by the government), OTP authentication via SMS/email, and Certificate of Election for the Chairman.

iii. **Admin Approval:**

LGA profiles require admin approval before activation (3–5 business days).

iv. **Admin Charges:**

LGA registration is free for the first 3 months after launch. After the introductory period, an admin fee applies for continued registration and access to the platform. All payments are processed via Paystack.

v. **Staff Registration:**

Each Chairman can register up to two staff members with limited permissions. Staff posts require Chairman approval before appearing on the platform.

3.3 Subscription & Tenure Management

ii. **Subscription Fee:**

LGAs must pay a subscription fee via Paystack after the initial 3-month free period: Monthly: NGN 10,000 | Annual: NGN 100,000.

iii. **Tenure Management:**

Posting rights are linked to the Chairman's tenure. When tenure ends, posts and subscriptions are suspended unless the Chairman is re-elected.

iv. **Re-election:**

Chairmen seeking re-election must provide proof of re-election (Certificate of Election) and undergo the same verification process (3–5 days for admin confirmation).

v. **Grace Period:**

A 7-day grace period is provided before suspension.

vi. **Staff Posting Rights:**

Staff can only post if their Chairman has an active subscription.

3.4 Federal Allocation Tracking & Publicising

vii. **Monthly Allocation Data:**

Once the Federal Government releases monthly allocations, the portal will publicise what goes to each State and each LGA. Citizens will be able to view this data in a clear, accessible format.

viii. **Content Creation by Admin:**

The portal admin will be responsible for creating and publishing content related to allocation information. This includes written analysis, infographics, and summary reports.

ix. **Historical Allocation Data:**

All allocation data will be archived and searchable by month, State, and LGA, allowing citizens to track trends over time.

x. **Comparison Tools:**

Citizens can compare allocation amounts across LGAs and States to promote informed civic discourse.

3.5 Interactive Map & Location-Based Viewing

xi. **Interactive Map:**

Displays updates from all 774 LGAs on a visual map of Nigeria.

xii. **LGA Details:**

Clicking on an LGA reveals the Chairman's posts, project photos/videos, public comments, and allocation data.

xiii. **Colour-Coded Markers:**

Indicate project categories (e.g., Roads, Health, Education, Water, Agriculture).

xiv. **Project Status:**

Users can track project status (Completed, In Progress, Pending) in real-time.

xv. **Archived Projects:**

Archived projects remain visible for public reference.

3.6 LGA Project Showcase

xvi. **Project Publication:**

Registered LGAs can showcase their completed and ongoing projects using a combination of videos, images, and textual information.

xvii. **Project Details:**

Each project listing must include: project title, description, category, status (Completed/In Progress/Pending), location, budget, start date, expected completion date, and supporting media (photos and videos).

xviii. **Prerequisite:**

Only LGAs that are fully registered and verified on the portal can publish project updates.

xix. **Media Support:**

Support for multiple image uploads, video uploads (or YouTube/video links), and rich text descriptions.

3.7 Public Engagement & Transparency

xx. **Reactions:**

Citizens can react to posts (Like, Dislike, Support, Question, Report).

xxi. **Comments & Feedback:**

Citizens can leave detailed comments and feedback on LGA posts and project updates.

xxii. **Sharing:**

Posts can be shared via WhatsApp, Twitter (X), and Facebook.

xxiii. **Reporting System:**

Citizens can report inappropriate content. Flagged posts undergo manual review by the admin.

xxiv. **Content Moderation:**

AI-powered moderation to filter inappropriate language and spam.

xxv. **Admin Authority:**

Admins can delete posts or ban users violating guidelines.

3.8 Advertising & Ads Placement

xxvi. **Ads Placement Feature:**

The portal will feature an ads placement system that allows businesses and organisations to advertise on the platform.

xxvii. **Subscription Plans:**

Advertisers can choose from multiple subscription plans (e.g., Basic, Standard, Premium) with different placement options, durations, and pricing tiers.

xxviii. **Ad Formats:**

Support for banner ads, sidebar ads, sponsored posts, and featured listings.

xxix. **Payment via Paystack:**

All ad subscription payments are processed through Paystack. Upon successful payment, automated email notifications are sent to both the admin and the advertiser.

xxx. **Ad Management Dashboard:**

Advertisers get a self-service dashboard to manage their campaigns, view impressions, and track ad performance.

xxxi. **Admin Ad Management:**

The admin has full control over ads placement management, including approving/rejecting ads, setting pricing, managing ad slots, and monitoring revenue.

3.9 Payment & Notifications

xxxii. **Payment Gateway:**

All payments on the platform (LGA subscription fees, admin charges, and ads placement subscriptions) will be processed through Paystack.

xxxiii. **Email Notifications:**

Every successful payment triggers an automated email notification to both the admin and the user who made the payment. Notifications include payment amount, date, purpose, and transaction reference.

xxxiv. **Payment History:**

Users and LGAs can view their complete payment history on their respective dashboards.

xxxv. **Invoice Generation:**

Automatic invoice generation for all transactions.

3.10 Admin Panel & Management

xxxvi. **Full LGA Management:**

Admin can view, approve, suspend, or deactivate any LGA profile. Admin can also view the number of registered citizens per LGA.

xxxvii. **User Management:**

Admin can manage all user accounts, including citizens, LGA staff, and advertisers. Admin can suspend or ban users for policy violations.

xxxviii. **Ads Placement Management:**

Admin has complete control over the advertising system, including plan creation, pricing, ad approval, slot management, and revenue tracking.

xxxix. **Content Creation & Publishing:**

Admin is responsible for creating and publishing content related to federal allocations, LGA activities, news, and platform announcements.

xl. **Engagement Analytics:**

Admin dashboard provides engagement tracking (views, comments, reactions), sentiment analysis reports, and downloadable monthly reports (PDF).

xli. **Content Moderation:**

Admin reviews flagged content and manages the moderation queue.

3.11 Chairman Dashboard (Performance Insights & Scheduling)

xl.ii. **Engagement Tracking:**

Tracks views, comments, reactions, and citizen feedback for the LGA.

xl.iii. **Sentiment Analysis:**

AI-generated sentiment analysis reports on public feedback.

xl.iv. **Monthly Reports:**

Downloadable as PDFs.

xl.v. **Post Scheduling:**

Allows Chairmen to schedule planned announcements.

xl.vi. **Subscription Tracking:**

Reminders for subscription renewal.

xl.vii. **Citizen Registration Stats:**

View how many citizens from the LGA have registered on the platform.

3.12 Data Management & Archiving

xl.viii. **Archived Content:**

Archived content remains publicly accessible even after a Chairman's tenure ends.

xl.ix. **Re-election:**

If re-elected, the Chairman's profile and past projects are restored.

l. **Engagement Data:**

Likes, comments, and views are retained after re-election.

li. **Chairman Succession:**

Each LGA maintains a continuous record of all Chairmen and their activities. New Chairmen inherit the LGA page but start their own tenure-specific record. Projects and activities are clearly marked with the respective Chairman's name and tenure period. Historical data is preserved and accessible for reference.

lii. **Public Access to Historical Data:**

Citizens can search and view records by specific tenure periods, Chairman names, and LGA. Search filters allow easy navigation through different administration periods.

3.13 Government Collaboration & Transparency

liii. **Government Data Integration:**

Integrates with Federal & State Government data (e.g., budget allocations per LGA).

liv. **Procurement Portal Integration:**

Tracks awarded public contracts.

lv. **Audit Reports:**

Allows citizens to monitor fund utilisation.

3.14 News & Press Integration

lvi. **Press Releases:**

Official government press releases.

lvii. **Live Streaming:**

Live streaming of major government project launches.

lviii. **Archived Press Releases:**

Available for reference.

3.15 Additional Features

lix. **Appointees for Posting:**

Chairmen can appoint two individuals to post on their behalf (subject to Chairman approval).

lx. **Google API Integration:**

Google Maps API displays project locations with pictures/videos.

lxi. **Multi-Language & Accessibility Support:**

Languages: English (Default), Hausa, Igbo, Yoruba, and Pidgin English. Accessibility: Voice-to-Text & Text-to-Speech for accessibility. Dark Mode & High Contrast Mode for visually impaired users.

lxii. **Future Expansion – Mobile App:**

Push Notifications for government updates. Offline Mode for browsing past posts. QR Code Scanning for on-site project verification.

4. Non-Functional Requirements

4.1 Performance

- lxiii. The platform should handle up to 10,000 concurrent users without performance degradation.
- lxiv. The interactive map should load within 3 seconds.
- lxv. All pages should achieve a load time of under 4 seconds on a standard 4G connection.

4.2 Security

- lxvi. All user data must be encrypted in transit and at rest.
- lxvii. JWT authentication for secure user sessions.
- lxviii. Regular security audits to ensure compliance with data protection regulations (including NDPR – Nigeria Data Protection Regulation).
- lxix. Paystack PCI-DSS compliance for all payment transactions.

4.3 Scalability

- lxx. The platform should be scalable to accommodate future growth, including additional LGAs and users.
- lxxi. The database should support large volumes of data, including project updates, images, videos, and allocation records.

4.4 Usability

- lxxii. The platform should be intuitive and easy to navigate for citizens, LGA staff, and advertisers.
- lxxiii. Multi-language support and accessibility features should be implemented to ensure inclusivity.
- lxxiv. Responsive design for optimal experience across desktop, tablet, and mobile devices.

5. Technical Requirements

5.1 Tech Stack

- FullStack Technology: Next.js (React-based framework with server-side rendering, API routes, authentication, and admin panel).
- Database: PostgreSQL + PostGIS (location-based data).
- Payments: Paystack API (subscriptions, LGA admin fees, ads placement payments).
- Mapping: Leaflet.js / Mapbox (interactive LGA map).
- Authentication: JWT Authentication (Next.js with NextAuth.js or custom JWT middleware).
- Email Notifications: SMTP integration for automated payment and system notifications.
- Content Management: Custom admin dashboard built in Next.js with content creation tools for allocation data and news publishing.

5.2 Hosting & Deployment

- The platform will be hosted on a cloud-based infrastructure (e.g., DigitalOcean, AWS, Azure, Google Cloud, or a local hosting company in Nigeria).
- Continuous Integration/Continuous Deployment (CI/CD) pipelines will be set up for automated deployments.
- CDN integration for fast media delivery (images and videos).

5.3 API Integrations

- Google Maps API: For displaying project locations with pictures/videos.
- Paystack API: For handling all payment transactions (subscriptions, admin fees, ads placement).
- Government Data APIs: For integrating budget allocations and procurement data.
- Email Service API: For automated transactional email notifications.

6. Joint Venture & Revenue Sharing Model

The project is a joint venture with a revenue-sharing model where the contractor (developer) holds a 40% share and the client holds a 60% share. The project development cost of NGN 960,000 is payable to the contractor to cover the cost of developing the application.

Additional revenue streams include LGA admin fees (after the 3-month free period), ads placement subscription revenue, and any future premium features.

7. Responsibilities

Contractor's Responsibility:

Handle all development, maintenance, and support including feature upgrades on the application. This includes content management system setup, payment integration, ads placement system development, and platform monitoring.

Client's Responsibility:

Handle all financial requirements for development, deployment, security, tools, and maintenance. This includes sourcing and publishing allocation data, stakeholder engagement with LGAs, and marketing of the platform.

8. Payment Schedule

The project duration is four months, with payments tied to four milestones as follows:

Milestone	Timeline	Payment %	Amount (NGN)	Notes
Milestone 1	Month 1–2 (Phase 1)	40%	384,000	Upfront payment upon commencement
Milestone 2	Month 3 (Phase 2)	35%	336,000	After Phase 2 delivery
Milestone 3	Month 4 (Phase 3)	25%	240,000	After testing & deployment
Milestone 4	Post-Launch (Phase 4)	7%/month	67,200/month	Ongoing maintenance & monitoring
Total (Development)		100%	960,000	Excludes post-launch fees

Note: Milestone 4 (Post-Launch Maintenance) is billed at 7% of the total development cost (NGN 67,200) per month, covering platform monitoring tools, bug fixes, performance optimisation, and minor feature enhancements.

9. Timeline & Milestones

Phase	Description	Duration	Milestone
Phase 1: Requirements, Design & Core Development	• Finalise requirements with stakeholders. • Create wireframes and design mockups. • Citizen registration & engagement module. • LGA registration & verification. • Interactive map with LGA updates. • Public engagement tools (likes, comments, shares). • Basic Chairman dashboard (engagement tracking).	5 Weeks	Milestone 1 40% Payment (NGN 384,000)
Phase 2: Advanced Development	• Subscription & tenure management. • Federal allocation tracking & publicising. • Ads placement system & subscription plans. • AI-powered sentiment analysis. • Post scheduling & subscription tracking. • Government data integration (budget, procurement). • Payment integration (Paystack) with email notifications. • Admin panel (LGA, user, ads, content management). • News & press integration.	5 Weeks	Milestone 2 35% Payment (NGN 336,000)
Phase 3: Testing, QA & Deployment	• Conduct user acceptance testing (UAT). • Perform security and performance testing. • Deploy the platform to production. • Conduct a soft launch with a select group of LGAs.	4 Weeks	Milestone 3 25% Payment (NGN 240,000)
Phase 4: Post-Launch Support & Maintenance	• Monitor platform performance and user feedback. • Implement bug fixes and feature enhancements. • Maintain platform monitoring tools and analytics. • Ongoing security updates and performance optimisation.	Ongoing	Milestone 4 7% of total/month (NGN 67,200/month)

10. Legal Agreements

1. **Non-Disclosure Agreement (NDA):** An NDA will be signed by both parties to ensure the confidentiality of the project details, including the revenue-sharing model and technical specifications.
2. **Service Level Agreement (SLA):** An SLA will define the expected uptime, response times for bug fixes, and support availability during the post-launch maintenance phase.
3. **Data Protection Compliance:** Both parties agree to comply with the Nigeria Data Protection Regulation (NDPR) in handling all citizen and user data on the platform.

11. Conclusion

The Local Government Area (LGA) Citizen Portal is a comprehensive digital governance platform designed to enhance transparency, accountability, and citizen engagement across Nigeria's 774 LGAs. By publicising local government activities, federal allocations, and project progress, and by empowering every Nigerian citizen to register, engage, and monitor their LGA, the platform aims to foster trust and collaboration between local governments and the communities they serve.

The addition of advertising features, comprehensive admin tools, and a robust payment system ensures the platform's financial sustainability while maintaining its core mission of promoting good governance and civic participation.
